

EnC chair Cantilever legs

0121xx

Features

A versatile seating solution with a robust welded frame, ergonomic shell, and cantiliver legs for stability. Its durability, comfort, and compliance with EN1729 standards make it ideal for modern seating environments. The EnC chair features shoe glides for smooth movement and floor protection.

Frame : Crafted from molded polypropylene, the EnC chair's shell offers durability and comfort.

Shell : The chair's welded MS tube cantilever frame combines 25mm diameter MS steel and metal pipe with 16-gauge thickness, ensuring stability.
